

BCH4VET

Developing a European learning outcome-oriented modular VET programme and educational resources on Blockchain to address technical, non-technical and cross-discipline (horizontal) skills requirements

DISCOVER THE BCH4VET PROJECT

Developing a European learning outcome oriented modular VET programme and educational resources on Blockchain to address technical, non-technical and cross-discipline (horizontal) skills requirements.

The project aims to develop **innovative educational materials** in the field of **Blockchain** to address the phenomenon of workforce mismatch, which is one of the major obstacles to education and vocational training. The project's goal is to bridge this training gap by creating a **curriculum that qualifies workers, benefiting the overall workforce.**

Recognizing the challenges of keeping with the rapidly advancing blockchain market, the project proposes novel training modules that integrate modern technologies not previously explored in educational projects. Leveraging gamification techniques and AI-supported IoT technology, the project seeks to **enhance both teachers' digital skills and students' practical understanding of blockchain concepts.**

A key innovation of the project is the introduction of a transferable evaluation system, **utilizing AI to provide objective feedback to students and teachers**, thereby contributing to educational innovation within the DigCompEdu framework.

First Transnational Meeting

Kick Off Meeting in Rotterdam

PARTNERSHIP

KICK OFF MEETING

The kick-off meeting took place in **Rotterdam** in **September**, with all seven partners in attendance, hosted by **Nefinia**.

During the meeting, each partner presented their respective organizations, highlighting their roles, expertise, and contributions to the project.

The meeting then turned into a more practical phase, discussing project management, responsibilities, reporting, and communication within the partnership.

Another topic covered was the Work Packages, providing an overview of activities, upcoming tasks, and deadlines.

-  Nefinia
-  Innomate Ltd.
-  Exeo Lab Srl
-  INERCIA DIGITAL SL
-  INNOVATION HIVE
-  UNIVERSITA TELEMATICA INTERNAZIONALE - UNINETTUNO
-  EPRALIMA - ESCOLA PROFISSIONAL DO ALTO LIMA - COOPERATIVA DE INTERESSE PUBLICO E RESPONSABILIDADE LIMITADA
